☎ 8349876133 ✉ pahujaneesh7@gmail.com 🔗 <https://www.linkedin.com/in/neelesh-pahuja-64b8bb249/>

Summary

Data Analyst with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

Technical Skills

Programming Languages: SQL, Python

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation
Data Visualization: Power Bi, Matplotlib, Seaborn, Excel Dashboards

Machine Learning: Scikit-learn, Supervised & Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation

Deep Learning: TensorFlow, Keras, PyTorch, Neural Networks, CNN, RNN/LSTM

Database Management: MySQL, SQL Queries, Data Modeling, Data Extraction

Experience

Data Science Intern

June 2026 – Present

Saanvi Innovation Private Limited

Gwalior

- **Developed and optimized machine learning models** using Python and Scikit-learn to solve real-world prediction and classification problems, improving model accuracy and reliability for business use cases.
- Performed end-to-end data preprocessing, feature engineering, model evaluation, and hyperparameter tuning—delivering clean, well-documented code that supported team experiments and final deployments.

Data Analyst Intern

July 2024 – October 2024

Wasserstoff (Remote)

Tools Used: Excel, SQL, Power BI

- **Processed and standardized a dataset of over 1,00,000 rows** from multiple regions to support weekly analytics—enabled business teams to track KPIs across geography and time.
- Also worked as an Image Annotation Intern, labeling and categorizing visual data for machine learning and computer vision projects.
- Developed and maintained Power BI dashboards to visualize revenue trends, customer mix, and monthly performance—regularly used by managers and analysts across business units.

Projects

Loan Approval Prediction | Python, Machine Learning

May 2026 – June 2026

- **Tools Used :** Python, Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn, SHAP, Jupyter Notebook
- Built an end-to-end loan approval prediction pipeline on a dataset of 2,700 records, covering data understanding, cleaning, outlier handling (IQR), feature engineering, encoding, and scaling.
- Trained and compared multiple classification models — Logistic Regression, Decision Tree, Random Forest, and XGBoost — achieving up to **99.3% accuracy** and **0.999 ROC-AUC** on the test set with strong precision and recall.
- Performed cross-validation, generated confusion matrices and classification reports, and used SHAP for model interpretability to understand key drivers of loan approval decisions.

HR Analytics Dashboard | Power BI

April 2026 – May 2026

- Designed and developed an interactive dashboard to analyze HR data, focusing on key metrics such as employee attrition, department-wise distribution, job satisfaction, and performance ratings.
- Performed data cleaning and transformation to ensure accurate reporting and meaningful insights.
- Visualized trends in hiring, employee retention, and workforce diversity using charts like bar graphs, pie charts, line plots, and KPIs.

Certifications

- **Data Analyst Workshop Certificate:** Completed 8 practical case studies involving SQL, data cleaning, dashboards, and presentations.
- Gained practical exposure to real-world datasets, developed dashboards, and interpreted analytical results to derive actionable insights.
- Strengthened foundational skills in tools such as Excel, Power BI, and Python libraries (Pandas, Matplotlib) through guided exercises and case studies.

Education

Bachelors of Computer Application (BCA) <i>ITM University , Gwalior</i>	2022 - 2025
Masters of Computer Application (MCA) <i>Chandigarh University , Chandigarh</i>	Pursuing
